Acknowledgements

The proposal to host the 23rd ICTAM by the Chinese Society of Theoretical and Applied Mechanics (CSTAM) was warmly accepted by the IUTAM Congress Committee at its meeting in 2008, with a first attempt to host an ICTAM in China made in 1988. Through the journey of twenty years, the mechanics community of China had been providing consistent support to the application, which was also backed by the China Association for Science and Technology, the National Natural Science Foundation of China, and many other organizations. Throughout the four-years preparation, the Executive Committee of the IUTAM Congress Committee had been looking after the organization of the Congress very carefully, for which we are most grateful. In particular, Hassan Aref provided tremendous help in the organization of the Congress. His help and dedication were gratefully appreciated and remembered.

Special thanks go to the Chairs of the Mini-Symposia and the Pre-Nominated Sessions, the eight National Pre-Selection Committees, and the International Papers Committee (IPC). The Chairs invited and solicited papers of high quality. The Chairs and the eight National Pre-Selection Committees also assessed the submitted papers. The IPC, which was generously hosted by the Technical University of Denmark, evaluated and accepted the papers for lectures and seminars. Hundreds of participants carried out the duty of a session chair; some of them also reviewed the full-length papers published in this volume. We are grateful to them.

The preparation of the Congress would not have been accomplished without the auspices and backing of many organizations, authorities and individuals. We must thank the members of the Local Organizing Committee and the Chinese Steering Committee for their advices and consistent support. Twenty nine institutions of China provided generous financial support which was vital and ensured that the Congress could be held in a modern convention center. The members of the Secretariat, and the staff of the CSTAM office have been working extremely hard and efficiently in carrying out the detailed work of the preparation before the Congress, in running it smoothly, and also in editing the Proceedings after the Congress. More than 80 volunteers have been serving the Congress for the week. Their work is much appreciated.
